LIST PRICE EX VAT **£249**

THE ONLY BATTERY TESTER YOU NEED

PBT 700 BATTERY TESTER WITH PRINTER
ref: 024229

- Tests charging systems & alternator in seconds
- Alternator test 12/24V
- START/STOP EFB/AGM/GEL/VRLA etc.
- Battery capacity: 7-240Ah
- Backlit screen
- Thermal printer (no ink required) with Full test report.
- Paper and acid/shock resistant case included

EASYCUT 25 PLASMA CUTTER

ref: 072046

- Cuts up to 8mm steel/6mm aluminium
- Single phase plasma cutter
- Suitable for all types of metal
- Digital Pressure Sensor
- Requires 4.5 bar, 115l/min compressor
- Supplied with 4m detachable torch & earth clamp

Save 20%

£599
LIST PRICE EX VAT £747

GYSFLASH 100.12 BATTERY SUPPORT UNIT

ref: 029002

- Provides perfectly stable voltage and current during diagnostics, ADAS, and MOT work
- 12V | 100A Charges all battery types
- Safely start modern vehicles 12V
- Multi-stage charge to 100%
- Protection for vehicle electronics
- SOS Recovery: recovery of sulphated batteries
- 5M Cable

Save £100

£729
LIST PRICE EX VAT £829

*Trolley/laptop not included

BATTERY CHARGER GYSFLASH 4.12

ref: 029521

The GYSFLASH 4.12 is a high-performance, ultra-safe 12V battery charger ideal for vehicles like motorbikes and cars.

Its intelligent 7-step charging curve ensures optimal battery health and quick charging, making it highly efficient. With advanced safety features including protection against short circuits, polarity reversal, and overcharging, it guarantees complete safety for your vehicle's electronics.

12V | 1.2 - 70Ah charge | 1.2 - 130Ah maintenance

Save 20%

£55

LIST PRICE EX VAT £69.80

1 Safety

- ✓ Provides protection for the vehicle's electronics
- ✓ Safe to charge in situ - no need to disconnect from the battery
- ✓ Polarity reversal protection
- ✓ Incorrect voltage protection

2 All Battery Types (LEAD ACID)

- ✓ Smart: advanced charging curves to suit the battery type e.g AGM, EFB, Stop Start, Silver/Calcium

3 Universal Mode

- ✓ A function allowing the user to charge the battery safely when the type is not known

BATTERY CHARGERS BATIUM 7.12 & 15.12

BATIUM chargers are ultra-safe, microprocessor-controlled battery chargers designed for GEL, AGM, VRLA, and liquid batteries. They ensure 100% charge and cut charging time by 50% compared to traditional chargers. With features like automatic, unsupervised charging, deep discharge recovery from 1V (15.12 only), and protection against sparks and short circuits, they guarantee maximum efficiency and safety for your vehicle's electronics.

MODEL	REF	V	CHARGE RANGE	SOS RECOVERY	SUPPLY
BATIUM 7.12	024557	6/12V	15-130Ah		
BATIUM 15.12	024632	6/12V	35-225Ah	✓

12V/24V STARTER CHARGER STARTIUM 680E

ref: 025585

The STARTIUM 680E is a versatile and ultra-safe 12-24V starter charger designed to handle AGM/Gel and liquid batteries.

Starting: 12V 380A | 24V 270A. Smart start detects damaged batteries, protecting vehicle electronics.

Charging: 12V 20 - 675Ah / 24V 20 - 525

It provides advanced multi-stage charging, ensuring 100% charge without supervision. With smart technology for real-time analysis and automatic adjustment, it guarantees safe charging for deeply discharged batteries and protects vehicle electronics with features like spark-free connections and automatic fault detection.

EV Charger

SUPER PRO EV CHARGER

ref: 080676

Ideal for workshops & car dealers

Bring the charger to the car, not the car to the charger!

Suitable for Plug in Hybrids (PHEV) and full EV's

Supplied with single phase 16A, 3 phase power cable and carry case

Long reach cables - total reach 6m - power cable 1.1 m

charging cable 4.9m

Time delay function (to take advantage of off-peak electricity rates)

No need for costly fixed installation

Easy to swap between single and 3 phase depending on the electrical outlet

Complies with IEC 61851-1, EN62752 & EN62196 - IP55 protective rating

LITHIUM BOOSTER NOMAD 500

ref: 069633

The NOMAN POWER 500 is a lithium power pack that combines 3 functions: booster, power supply for electronics, and emergency lamp. Its lithium battery provides exceptional power in a very small form factor.

SAFE boosting:

- Anti-spark technology
- Short circuit protection
- Reverse polarity protection
- Protection against excessive starting currents
- Protection against booster temperature increase

12V | Start: 550A | Cranking CC: 1300A

MIG WELDING READY TO WELD PACKS

EASYMIG 160 - READY TO WELD PACK

ref: U62255

the EASYMIG 160: a lightweight, portable welding machine for MIG/MAG, flux-cored, and MMA welding. With an intuitive digital interface, it ensures quick, precise adjustments. Perfect for steel, stainless steel, and aluminium, it features anti-stick technology and supports gas and no-gas operations. Ideal for both indoor and outdoor projects.

160 Amp single phase

30-160A MIG/ 20-140A MMA

Takes 1kg & 5kg wire reels

Supplied with euro torch, earth clamp, electrode holder, truecolor welding helmet, 0.8mm steel MIG wire, regulator & leather welding gauntlets.

LIST PRICE EX VAT £747.60

Save £188

MULTIWELD 200M - READY TO WELD PACK

ref: U66595

The MULTIWELD 200M is a compact, versatile welding machine. This single-phase inverter supports MIG-MAG, flux-cored, and MMA welding, featuring an intuitive dual-display interface for precise adjustments. With its four-roller wire-feed system and compatibility with various wire types, including aluminium and flux-cored, it ensures top-welding quality. Easily controlled, even with gloves on.

200A single phase

Takes 5kg & 15kg wire reels

Requires 16A input supply

(can work up to 160A with 13A plug)

Supplied with euro torch, earth clamp, electrode holder, truecolor welding helmet, 0.8mm steel 5kg MIG wire, regulator & leather welding gauntlets

Induction Heating

Heat without Flame

Instantaneous

Safe

Precise

What is induction heating?

It is the process of heating a metal by electromagnets

How does it work?

An electronic device passes a high-frequency alternating current (AC) through the electromagnet. The rapidly alternating magnetic field penetrates the object, generating electric currents inside it - these are called 'Eddy currents'. These Eddy currents flow through the resistance of the material and heat it up.

The induction heating process generates the heat inside the object itself rather than heating the object by an external source, for example with oxy-acetylene.

Benefits of Powerduction

1. Safe - flameless heating reduces the risk of fire
2. Accurate - only heats the required parts, not the surrounding area
3. Fast - heats to the heart of the metal quicker than a flame
4. Easy - no training required
5. Reduced costs

UNIVERSAL 800 TROLLEY
